### **DETAILED ACTION**

The following action is in response to application 10/711,223 filed on September 2, 2004.

#### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the method for controlling a wheel drive system of a hybrid electric vehicle as claimed, and particularly including determining whether the first power source is to be started; determining whether a level of torque requested is greater than a threshold value if the first power source is to be started and the vehicle is in motion; maintaining the current gear ratio and providing the target level of torque with the motor, and including the remaining controls and structure of claim 1. The present invention also particularly includes inhibiting a gear ratio shift, and including the remaining structure and controls of claims 9 and 15, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ozeki, Yanagida, Gotou, Hirose, Kojima, and Tabata have been cited to show similar hybrid vehicle controls.
